Brief description of the conference

The International Conference on Pharmaceutical Material, Engineering, and Applied Sciences (ICOPMES) 2020 is an international event held to gather scientists, professionals, and other expertise to discuss new developments in pharmaceutical sciences in general. ICOPMES 2020 is organized by the Faculty of Pharmacy Universitas Hasanuddin, and will be held virtually on 18-19 November 2020. We invite you to submit your research products and to exchange information and scientific expertise with the topics included as follow:

- Pharmaceutical Material
- Physical Pharmacy
- Drug Delivery and Formulation
- Drug Release and Kinetic
- Pharmaceutical Engineering
- Biomedical Engineering
- Pharmaceutical Chemistry
- Phytochemistry
- Drug Synthesis and Production
- Pharmacology and Clinical Sciences
- Vaccine Discovery

In an effort to produce effective and safe medicinal preparations, and to keep abreast of developments in the world of health and medicine, various researches have been carried out by all scientists, including Indonesian scientists. Due to the development of various diseases and the increasing needs of the medical world, the use of conventional preparations has begun to be abandoned. Recently, many researches related to dosage formulations have focused on the development of novel drug delivery systems (NDDS) or modification of the physicochemical character of a drug to meet its therapeutic objectives.

Therefore, the Faculty of Pharmacy Universitas Hasanuddin provides a scientific forum entitled the International Conference on Pharmaceutical Materials, Engineering and Applied Science (ICOPMES) 2020.

This scientific conferenc

and publish innovations in the form of research results in (but not limited to) pharmaceuticals. This scientific conference will present a theme covering all pharmaceutical sciences, including the application of knowledge from various fields, such as chemistry, biology, epidemiology, statistics, mathematics, physics, to aspects of clinical pharmacy and social pharmacy. This shows the commitment of this activity to bring together scientists, professional practitioners with various other parties to collaborate in the form of an exchange of ideas to then find solutions to world health problems. Finally, due to the current conditions of the Covid-19 pandemic, this scientific conference will be held virtually. However, the organizing committee has been determined to include several invited speakers from various countries, so that even though it is implemented virtually, it is hoped that the objective of this conference will be maximally achieved.
